About Us

Rapidfire Security Solution is a trusted service company specializing in fire safety and security systems.

The company was founded by Mr. **Samir Virani** & Mr. **Alpesh Dosani**

with a vision to provide reliable and high-quality fire safety solutions. Our expertise includes System Design & Engineering, Supply of Fire Fighting Equipment, Professional Installation, Testing & Commissioning, Fire NOC Consultant, and AMC & Maintenance Services. With **6 years** of experience,

Rapidfire Security Solution has successfully served **200+** clients across DNH, Daman, Gujarat, and Maharashtra, delivering trusted fire protection solutions.

FIRE ALARM SYSTEM

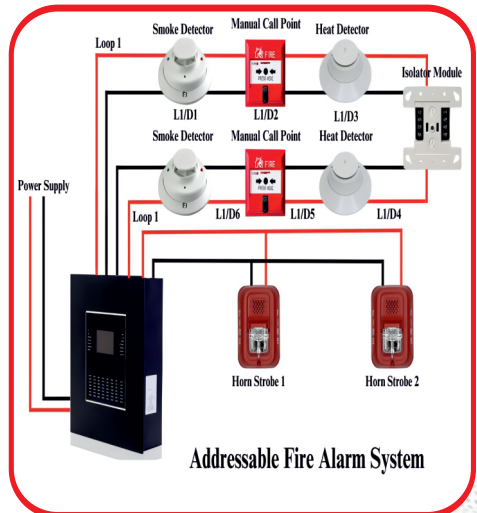

● CONVENTIONAL FIRE ALARM SYSTEM

A Conventional Fire Alarm System is a reliable fire detection system designed to detect smoke or heat and alert occupants during a fire emergency. The system divides the building into different zones, making it easier to identify the general area where the fire has occurred.

● ADDRESABLE FIRE ALARM PANEL

An Addressable Fire Alarm System is an advanced fire detection system that identifies the exact location of smoke or fire within a building. Each detector has a unique address, allowing faster response and easier monitoring.

PA SYSTEM

- **INTEGRATED PA SYSTEM**

A Public Announcement (PA) System is an Electronic System used to amplify and distribute sound to a large audience, Commonly Found in Public Spaces Like Airports, Trains Stations, and Stadiums & Industries.

EMERGENCY SITUATIONS : Delivering Critical Alerts & Instructions During Emergencies Like Fire Alarms or Security Breaches.

- **PA (PUBLIC ADDRESS) TALKBACK SYSTEM**

Talkback System Combines a Public Address System With Two-Way Communication Capabilities, Often Used in Schools, Hospitals, and Other Large Buildings. This is Achieved Through Addressable Speakers and a Central Control Panel.

FIRE HYDRANT SYSTEM

A Fire Hydrant System provides a continuous and high-pressure water supply through hydrant valves, pipelines, hoses, and fire pumps. It enables firefighters or trained personnel to quickly control and extinguish fires in large buildings and industrial premises.

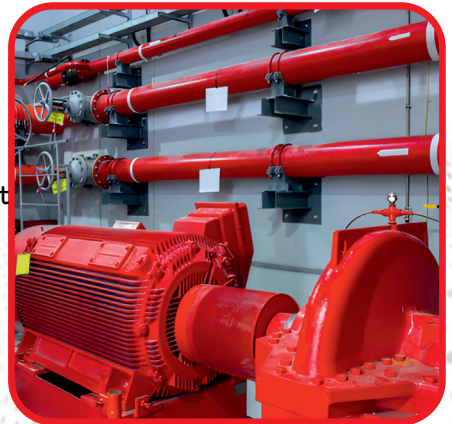

FIRE SPRINKLER SYSTEM

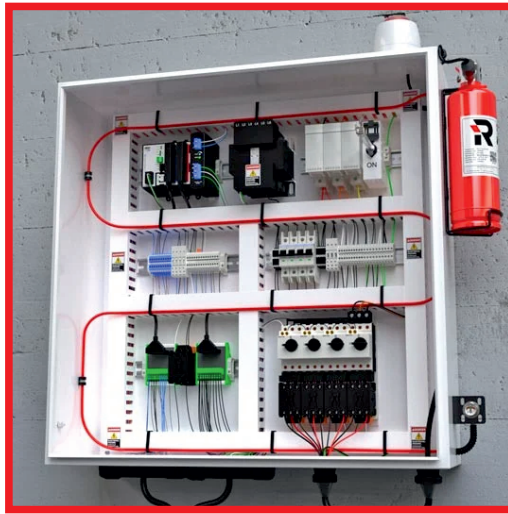

The Fire Sprinkler System is an automatic fire protection system that activates when the temperature rises due to fire. The sprinkler head releases water directly over the fire area, helping to control or suppress the fire at an early stage and reduce damage.

FIRE PUMP

The Fire Pump System is the heart of the fire protection system. It maintains the required water pressure and flow for hydrant and sprinkler systems. Our pump systems include main pumps, jockey pumps, and diesel pumps designed for reliable performance during emergencies.

ELECTRICAL PANEL FIRE SUPPRESSION SYSTEM

An electrical cabinet fire suppression system is designed to detect and extinguish fires that originate within electrical enclosures, protecting critical equipment and minimizing damage. These systems typically use clean agent fire suppressants and are triggered automatically by fire detection devices.

FIRE EXTINGUISHER

A fire extinguisher is a portable device designed to put out small fires or control them in emergency situations. It typically consists of a pressurized container holding an agent (like water, foam, dry chemical, or CO₂) that can be discharged to extinguish or suppress a fire. Fire extinguishers are crucial for fire safety in various settings, including homes, offices, and vehicles.

FIRE RATED DOOR

Fire Rated Door Fire Rated Doors are specially designed safety doors that help prevent the spread of fire and smoke between different sections of a building during a fire emergency. These doors are manufactured using fire-resistant materials and are tested to withstand fire for a specified period, allowing safe evacuation and protecting property. At Rapidfire Security Solution, we provide high-quality Fire Rated Doors that meet fire safety standards and are suitable for industrial, commercial, and residential buildings, ensuring enhanced protection and safety.

FIRE EXIT LIGHT

Emergency Exit Lights are essential safety devices designed to guide people safely out of a building during emergencies such as fire or power failure. These lights automatically turn on when the main power supply is interrupted, clearly indicating the exit path and ensuring safe and quick evacuation.

FIRE SAFETY SIGNAGES

PPE Safety Items (Personal Protective Equipment)

At Rapidfire Security Solution, we provide a wide range of high-quality PPE Safety Items such as safety helmets, gloves, safety shoes, reflective jackets, goggles, ear protection, and other protective gear to ensure maximum safety and compliance with workplace safety standards.

AI-Based Fire Detection System

An AI-Based Fire Detection System uses advanced artificial intelligence and video analytics to detect fire, smoke, or abnormal heat patterns in real time through surveillance cameras. This technology can identify fire risks at a very early stage and immediately send alerts, helping to prevent major damage and ensure quick emergency response.

At Rapidfire Security Solution, we provide smart AI-enabled fire detection solutions designed for factories, warehouses, commercial buildings, and high-risk areas, delivering faster detection, improved safety, and reliable fire protection.

INDUSTRIAL ELECTRIC BOUNDARY FENCING

Industrial Electric Boundary Fencing is an advanced security system installed on boundary walls or compound perimeters to protect industrial and commercial premises. The system sends controlled electric pulses through the fence wires, which deliver a strong but safe shock to any intruder attempting to climb or cut the fence, effectively preventing unauthorized entry.

Gate Automation System

Gate Automation Systems provide a smart and convenient way to control the opening and closing of gates using automatic motors and remote access technology. These systems enhance security, improve access control, and reduce the need for manual operation.

CERTIFICATES

CERTIFICATE OF CONFORMITY

CE

This Certificate is given to the applicant for this following designated products

All Type Of Fire Alarm System, PA System, Fire Hydrant and Sprinkler System, Fire Suppression System, Fire Extinguisher Sales And Services

Manufactured By

RAPID FIRE SECURITY SOLUTION

204, Second Floor Quincy Park 2, Sally Road Baldevi Silvasa - 396230 DNH and DD, INDIA.

:: Certificate No :: DRAFT COPY

Issue Date : XX XX 2025
Valid Up to : XX XX 2028

The Certification body has performed a sample assessment of the above product quality system covering the processing, assembly & final inspection of the certified product by the quality system has been assessed, approved and is subject to continuous surveillance according to the Product Equipment/Order - 2014/001. No additional test report was carried out than submitted (sample of the product) in conformity with the Specification of the respective standards except those submitted by the Customer. The CE mark as shown above can be used, under the responsibility of the manufacturer, after completion of an ISO declaration of Compliance with all relevant CE Directives. This statement is based on a single evaluation of one sample of above mentioned product. It does not imply an assessment of the whole production. The declaration of conformity is issued under the sole responsibility of Manufacturer. Manufacturer declares under its sole responsibility that the product identified is in conformity with all relevant Union legislation.
